Discover BD's "Concept Injection Molding" Journey with the Lumia X1

Missed our live webinar? Tune in now!

BD has revolutionized their R&D process with "Concept Injection Molding," a method that turns ideas into injection-molded parts within a day. The synergy of the Lumia X1 and Ultracur3D® 3280 has dramatically sped up their workflow. In a recent webinar, BD's Brett Charlton delved into the details of this transformative process.

Want to improve your R&D? Watch the webinar recording now to see BD's rapid progress with Axtra3D's technology.
