3D Printed Molds Triple R&D Speed

LSI Solutions, a leading medical device manufacturer, turned to Aextra3D to transform its prototyping process using the Lumia X1's 3D printed ceramic mold inserts.

LSI Solutions increased mold production threefold in just six months. With unmatched speed, flawless surface quality and high durability, the Lumia X1 is a critical tool in their workflow, enabling faster iterations and low-volume production.

Evan Sutorius, Molding Manager for LSI Solutions mentions, "Our Aextra3D printer takes the pressure off of our moldmakers, as it can handle waves of production molds, freeing up the moldmakers and designers to take on more challenging design projects."

Aextra3D's Presence in the Military and Defense Sector

Thank you to our resellers for their support, enabling AextraSolutions™ to participate in the Military Additive Manufacturing Summit (MILAM).

Our presence at this event highlighted the versatility of our products across various industries.

Impac Systems showcased how AextraSolutions™ can effectively meet the unique challenges within the military sector.

Thanks for Visiting Us at Lab Day 2025!

We had a great time showing our Hi-Speed SLA technology and its impact on dental manufacturing.

Let's keep the conversation going—how can Aextra3D's accuracy, surface finish, and high throughput improve your workflow? Reach out to us.
