RECENT NEWS

Axtra3D's Presence at PTXPO

Through the support of two Axtra3D resellers, Impac Systems and Nota3D, our team exhibited at PTXPO, North America's Premier Molding and Moldmaking Event.

We got visitors excited over how the Lumia X1 enables injection molding with ceramic mold inserts, low-pressure molding, and high temperature micro-molding, delivering precision and speed for prototyping and concept development.

Solid Technologies Joins Axtra3D's Premium Reseller Channel

We're proud to welcome Solid Technologies as a premium reseller of Axtra3D's Hi-Speed SLA printing solution, bringing unmatched speed, precision, and surface quality to their customers.

With a strong reputation in resin-based 3D printing and a commitment to expert service and support, Solid Technologies is the perfect partner as we continue advancing automation and next-generation solutions for seamless integration into customer operations.

International Dental Show (IDS) - Cologne, Germany

At IDS (International Dental Show), we showcased our advanced dental solutions, emphasizing the Lumia X1's precision and efficiency.

Attendees had the opportunity to learn how the Lumia X1 can optimize printer utilization and improve lab profitability.

MECSPE - Bologna, Italy

Axtra3D joined our reseller Ridix at the MECSPE trade show, showcasing the Lumia X1's precision and efficiency to the Italian market. As a key reseller in Italy, Ridix is expanding access to our technology across industries.

MECSPE is Italy's leading trade show for manufacturing and industrial innovation, focusing on advanced technologies, automation, and digital manufacturing.

Axtra3D Expands Dental Solutions Portfolio, Oqcam Integration & 3Shape Compatibility

Axtra3D expands dental solutions portfolio with four new high-performance materials, optimized for the Lumia X1 3D printer to enhance accuracy, surface quality, and efficiency.

Additionally, real-time integration with Oqcam and enhanced 3Shape compatibility streamline workflows, maximize throughput, and elevate precision in dental applications.
