### Taking Silicone AM Into Production

VoxelMatters annual 2025 Polymer eBook dives into the evolving world of polymer consumables in 3D printing, from general-use polymer materials to high-performance industrial solutions.

The recent one spotlights our True Silicone Solution, optimizing AM with precision-grade, isotropic elastomer solutions.

### IMTS Feature

Axtra3D was spotlighted for eliminating tradeoffs with our Hi-Speed SLA technology.

The article highlights how our Lumia X1 delivers both high speed and ultra-fine detail, 20-micron surface finish and 50-micron features, outperforming traditional DLP and SLA systems.

This recognition follows our successful presence at IMTS 2024, and we're excited to return for IMTS 2026.

### Axtra.HS

Last month, we introduced Axtra.HS, our new resin handling system designed to streamline your workflow, reduce downtime, and protect your hardware investment.

By enhancing material management and extending the life of Axtra.VAT tanks and TruLayer membranes, Axtra.HS helps high-throughput users scale with confidence.

### Ridix Takes Axtra3D On The Road

Our reseller Ridix has been actively showcasing Axtra3D across Italy, putting high-performance parts in hundreds of new hands.

At Expodental Rimini, Axtra3D's Dental Solutions impressed labs with their speed, accuracy, and surface quality. Meanwhile, at SPS Parma, we demonstrated how Hi-Speed SLA delivers industrial-grade performance for automation and production.

Thanks to Ridix, Axtra3D is gaining strong momentum across dental and industrial markets in Europe.

### HZG Group: Axtra3D's Primary Investor

HZG Group follows a highly selective investment process, having screened approximately 2,600 startups to date. The firm prioritizes companies that align with its core belief that AM will be a cornerstone of Industry 4.0. Herzog emphasized two main criteria for investment: company culture and technological innovation.
