Strong Growth and Acceleration in H1 2025

We're incredibly thankful for the continued support and trust from our customers, partners, who are entrusting us as one of their growth partner.

We are also grateful to have the confidence and strategic backing of our investor HZG Group who have helped us scale with stability and clarity.

The first half of 2025 has been Aextra3D's most impactful period yet, fueled by real production needs and long-term relationships. We're proud to share four key milestones that underscore our momentum:

Revenue Acceleration: We're on track to double our 2024 revenue, driven by strong multi-sector demand and a sharp increase in unit placements.

Channel Growth: Our global reseller network grew by 40%, with near-complete U.S. coverage and strong traction across Europe, enabling faster deployment and stronger local support.

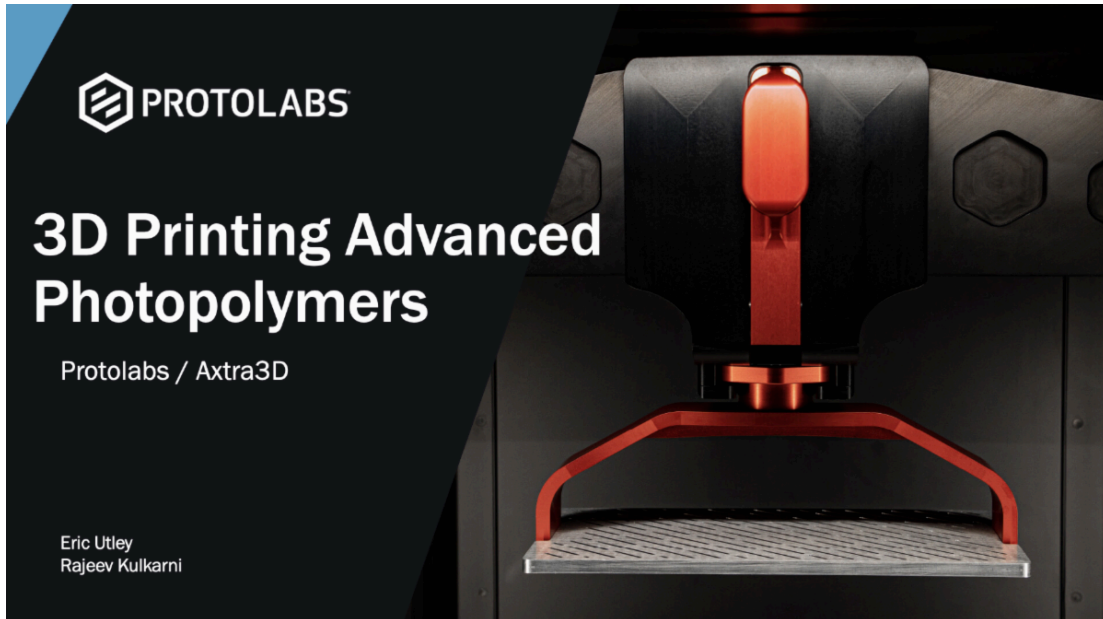

Customer Loyalty: 25% of customers have already added a second machine, highlighting trust in both our platform and our production-ready business model.

Reliability: Our fleet required only six service visits in H1, setting a new internal benchmark for up-time and reinforcing Hi-Speed SLA and Lumia X1's reputation for dependable, high-throughput performance.

As we continue to grow, we remain committed to building an ecosystem of materials, automation, and partners that supports scalable, real-world photopolymer production.

3D Printing Advanced Photopolymers Webinar

Discover how Hi-Speed SLA is transforming production workflows and enabling scalable, real-world applications, explored through the lens of one of the industry's most innovative digital manufacturers.

In our recent webinar, Protolabs shared how they're leveraging Aextra3D's technology to deliver high-quality parts at unprecedented speed.

Optimize Your Workflow with the Aextra.HS

The Aextra.HS is a purpose-built accessory designed to support efficient management of Aextra.VAT resin tanks used with the Lumia X1.

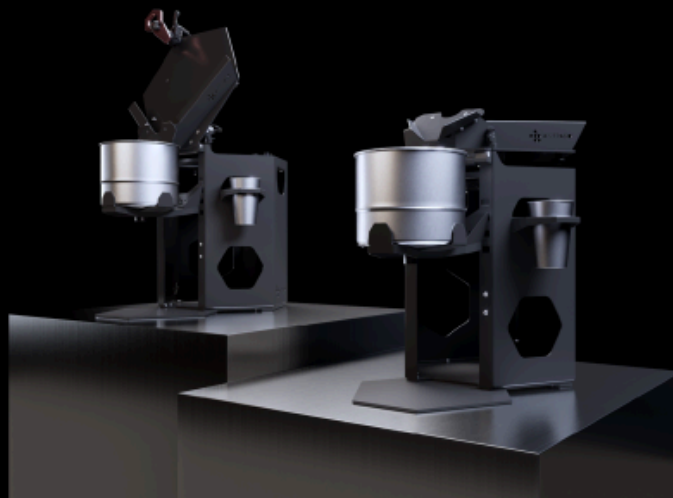

Engineered to simplify key post-processing tasks, the Aextra.HS facilitates easy resin removal, filtration, and cleaning, helping maintain both your Aextra.VAT tanks and TruLayer Membranes for consistent, high-quality performance.

Whether you're new to the platform or simply looking to streamline your process, the Aextra.HS is an essential addition to your workflow.
