Protolabs Expands to Four Axtra Solutions

Advanced Photopolymers for 3D Printing

Our HPS technology delivers high-quality 3D-printed parts

Certifications ISO 9001:2015 | ITAR

Axt3D proudly announces the successful expansion to four different Hi-Speed SLA material solutions at Protolabs, a global leader in digital manufacturing.

In just over a year since adopting their first Lumia X1 system, Protolabs expanded to multiple units, strategically scaling their advanced photopolymer capabilities to meet growing customer demand. Today, it offers four as fully optimized Axt material solutions as part of its “Advanced Photopolymers for 3D Printing” portfolio.

Special Guests at Axt's NextGen Manufacturing Booth

Axtra's booth at the Next Gen Manufacturing show, hosted at the Science Congress Center in Munich, Germany, got some exciting visitors!

Alongside a host of customers, we had the privilege of welcoming Hubert Aiwanger, the deputy Prime Minister of Bavaria, and Markus Blume, the Bavarian Minister for Science and Art, at our booth. They stopped in to explore the possibilities of Hi-Speed SLA within their programs.

Thank you to everyone who stopped by!

Welcome Riley to Axtra's Global Marketing Team!

We are excited to announce that Riley has joined Axtra's Marketing and Communications team, based in our U.S. office. With five years of experience across diverse marketing and communication roles, Riley brings a wealth of expertise and fresh ideas to our team.

We warmly welcome her to Axtra and look forward to the impact she will

have on strengthening our communications and connecting with our customers and partners.

LumiaX1 demo gets a fantastic turnout at Nota3D's Open House

Our sales leader, Greg Wilkman, demoed the Lumia X1's capabilities to a packed house at the Nota3D Open House. Visitors lined up to learn about the benefits of Hi-Speed SLA for additive manufacturing, including it's applications for low volume production, micro printing, and more.
